

FRAMO MORAT
FMG Industry

speero^x
Smart. Silent. Space-saving.

Engineered for a wide range of industries.

speeroX application examples.

Automotive: Low noise & lightweight for enhanced comfort.

Robotics: Compact design with high precision & reliable performance.

Conveyor technology: Energy-efficient with long service life & high reliability.

Intralogistics: Space-saving with high dynamics & mobility.

speeroX - Smart. Silent. Space-saving.

Achieving high gear ratio & angular power flow with only one stage.

Benefits at a glance:

- **Application-specific design** of gearing and material combination
- **Reduced installation** space thanks to separation of the wheel and worm
- **Long service life** thanks to low-wear gear engagement
- **High degree of efficiency** through friction reduction due to favorable kinematic conditions
- **Low noise emission** due to balanced proportion of sliding effects
- **High gear ratio and power flow** around the corner in only one stage

Steel-on-steel pairing: High power density for robust drive solutions.

Plastic-metal pairing: Ultra-compact & efficient for economical drive solutions.

Xplore your opportunities.

Customized design & development.

The benefits of **speeroX** compared to classic gear variants become clear when the requirement profile and area of use are precisely defined during the design phase. Framo Morat brings decades of experience in customized solutions to the table. You too can benefit from our expertise and the advantages of the **speeroX** gears.

What can we do for you?
